Key Features

>> INTELLIGENT VIRUS PROTECTION

Based on the proven F-Prot Professional scanning engine, and developed continuously over a period of ten years, Command Antivirus deploys far more easily, detects more viruses (and potential viruses), scans more file extensions, and returns fewer false positives than competing antivirus products.

>> AUTO-UPDATING CAPABILITIES

Authentium's auto-updating technology enables around-the-clock, and around-the-world protection against worm and virus outbreaks.

- In-house virus experts in multiple time-zones— facilitates fast response times
- Dynamic updating capability reduces need for rebooting when applying updates

>> UNLIMITED SCALABILITY

Command Antivirus is supported by most popular software deployment, management and reporting tools (including Authentium PatchMatrix™ and Galileo), allowing vitally unlimited deployment across multiple machines and any number of locations, and platforms.

>> ESP PLATFORM EXTENSION SUPPORT

Available modular extensions include spyware detection, behavior-blocking, popup blocking, web content filtering, and client-side, firewall-based, end-point policy enforcement.

>> AVMATRIX CUSTOMIZATION OPTIONS

Authentium AV Matrix provides numerous product customization and specialized deployment options, including private label branding, custom file extension support, multiple scan engine deployment, and object code software development kits.
