Key Features

>> ADVANCED VIRUS PROTECTION

Based on the proven F-Prot Professional scanning engine, and developed continuously over a period of ten years, Command Antivirus deploys far more easily, detects more viruses (and potential viruses), scans more file extensions, and returns fewer false positives than competing antivirus products.

>> EXCHANGE ADMINISTRATIVE CAPABILITIES

Authentium's auto-updating technology enables around-the-clock, and around-the-world protection against worm and virus outbreaks.

- CSAV Alerts allow administrators to send trap notifications through SNMP (Simple Network Management Protocol) (2000 & 2003)
- Virus Notification gives administrators the ability to send messages to additional administrators when an infected attachment is detected through on-access scanning
- Event Viewer allows administrators to view monitoring and troubleshooting messages from within Windows Event Viewer
- Performance Monitor shows administrators how CSAV is being utilized (2000 & 2003)
- Outbreak Manager allows administrators to define and configure rules to manage infected items received by the Exchange server (2000 and 2003)
- Automatic Update allows CSAV to update automatically with the latest program files and virus definitions
