Key Features

ESP Desktop Defense® prevents specified programs, including viruses, Trojans and MP3 files, from running, secures the desktop and control panels, prevents files and applications from being deleted, and controls where files can and can't be saved. ESP Desktop Defense® restricts access to control panels, settings, and applications, including the Internet, and can help prevent changing, movement, theft, or addition of applications and files.

In addition, it protects operating systems from viruses by preventing unauthorized application installers from running. No other security solution gives educators the complete protection, ease of use, and flexibility that ESP Desktop Defense® provides. Prevent changes to your system, drives, and the desktop environment by locking control panels and protecting settings..

ESP Desktop Defense® now prevents common instant messaging (IM) programs from running, including AIM Express, AOL Instant Messenger, MSN Messenger, Windows Messenger, Yahoo Messenger, and many others.

- Prevent dragging and renaming of files and folders
- Restrict changes to the desktop and system
- Protect the operating system and settings
- Lock control panels and registry
- Disallow the creation of shortcuts and aliases
- Restrict applications from running (e.g. chat/IM)
- Prevent Web browsers from running
- Prevent installing of unauthorized software
- Facilitate remote administration of security settings
- Set up multiple groups individual security settings
- Prevent interruption of events during start up
