ESP 2.0 Enterprise

Authentium's next-generation Extensible Security Platform for Enterprise allows System Administrators to easily deploy and manage multiple integrated security applications from Authentium and other "best of breed" developers.

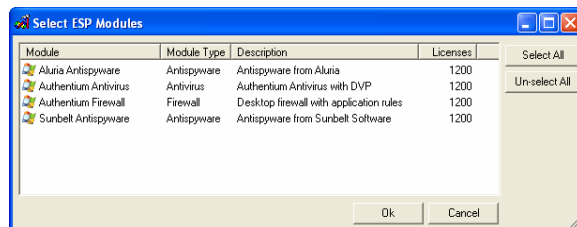

Key Benefits:

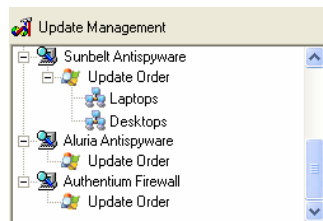

- Manage endpoint protection across the enterprise from one central console
- Select protection modules from a catalog of multiple vendors and technologies
- Create protection policies that block threats before they can compromise desktop security
- Swap out non-performing vendor modules with the click of a mouse
- View comprehensive reports on deployment, protection status and alert history
- Comprehensive threat database ensures protection against viruses, worms, trojans, spyware and other threats
- Certified by Microsoft, West Coast, VB100

Nobody else gives you this...

Choice of vendors! Only Authentium can provide you a choice of vendors in each protection category. New modules are being added every month.

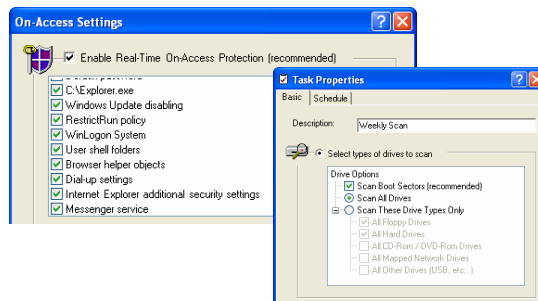

Total Control! Control which computer groups receive updates first to get the most timely protection where it is needed most in each protection category.

Realtime and Scheduled Protection!

Complete security with both on-access and scheduled scanning for viruses and spyware.
