

## patchMatrix™

- Agent or Agentless Operation
- No Server/SQL License Required
- Supports Multiple Domains/Admins
- 100% Active Directory Compliant

Introducing Authentium PatchMatrix, the only proven patch management solution that offers an OPTIONAL client agent, enabling network operators to detect vulnerabilities, automatically research and deploy updates, and validate patch deployment status.

PatchMatrix operates in agent or agentless mode, enabling administrators to simultaneously manage any machine – even isolated machines. AV Matrix™ antivirus protection (optional) ensures your network stays up, even when patches are unavailable.

### Return On Investment

Talk with an Authentium PatchMatrix expert today to find out how PatchMatrix can save you time, money, and enhance your organization's network risk management strategies.

## key features

### >> AGENT OR AGENTLESS OPERATION

Powerful patching technology enables patch management to locked-down or isolated machines.

### >> MULTIPLE SITE SUPPORT

Multiple management consoles enable centralized assignment/sharing of patch management tasks.

### >> INTEGRATED RESEARCH VIEW

Integrated Research View saves hours of searching online for patching information:

- Pre-categorized fixes make deployment a snap
- Knowledge base includes articles from Microsoft and GOPM.com Patch Management experts, plus critical deployment information
- Customizable customer fix database, including registry and file-based validations

### >> AUTOMATED DISCOVERY

Powerful, Active Directory-compliant vulnerability analysis automatically discovers missing patches.

### >> FAST-RESPONSE DEPLOYMENT

Fast-deployment enables immediate response to any combination of machines, or scheduled deployment for convenience.

### >> VALIDATION ON-THE-FLY

Enhanced validation database checks for CRC, file size, and file version information, to validate installations on the fly.

### >> POWERFUL REPORTING

Share reports among management console users, match the baseline against current inventory, and manage by exception.

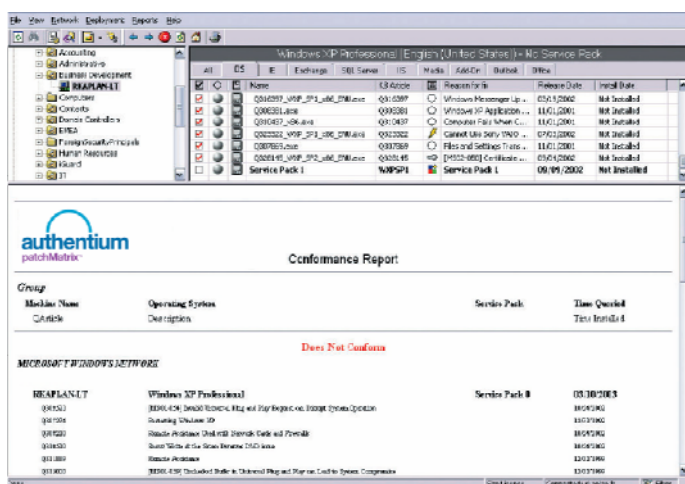

**GOT A QUESTION ABOUT PATCHING?**
